

Texas Department of Public Safety Texas Division of Emergency Management

Texas State Operations Center

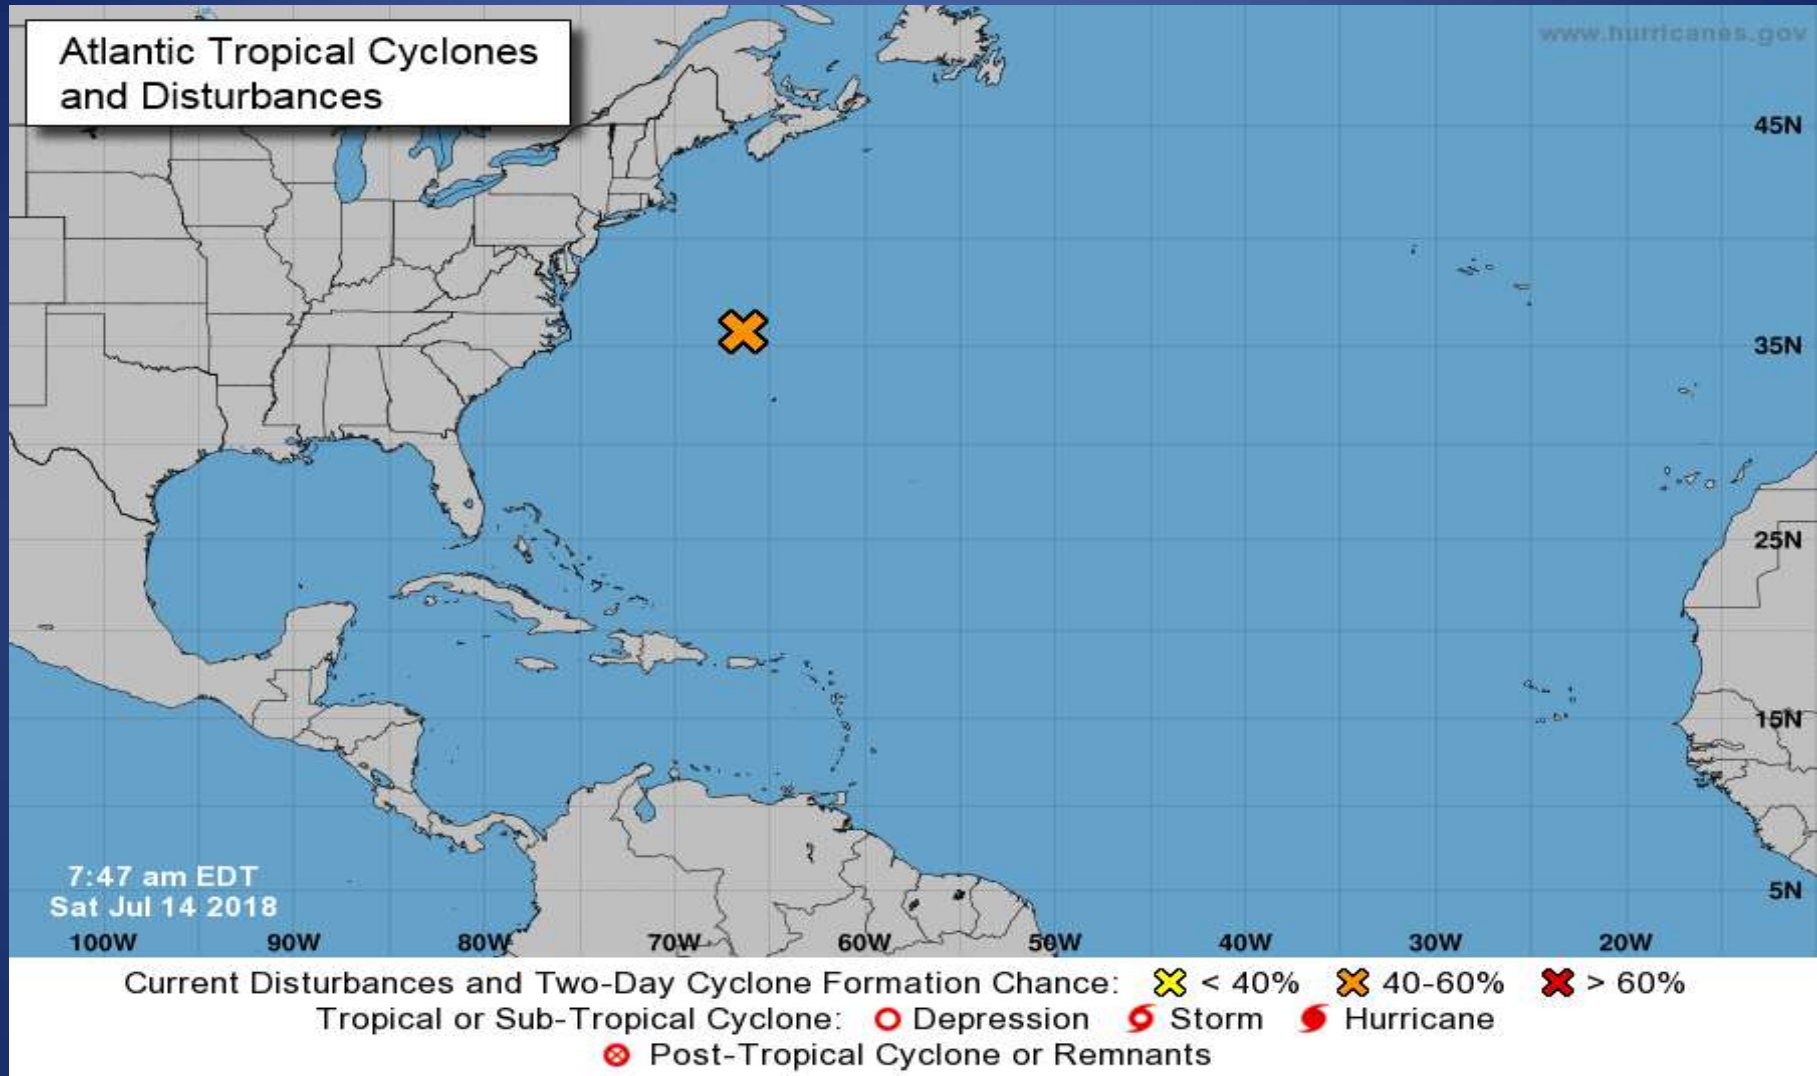

Situation Awareness Brief

Saturday, July 14th 2018
As of 0900 CST

Tropical Weather Awareness

An area of low pressure, associated with the remnants of Beryl, is located about 250 miles north-northwest of Bermuda. This system has become better organized during the past several hours, and it is producing winds of near gale force east of the center. Some additional development is possible today and tonight, and a subtropical or tropical cyclone could form before the system moves over cold water north of the Gulf Stream on Sunday. Additional information on this system can be found in High Seas Forecasts issued by the National Weather Service

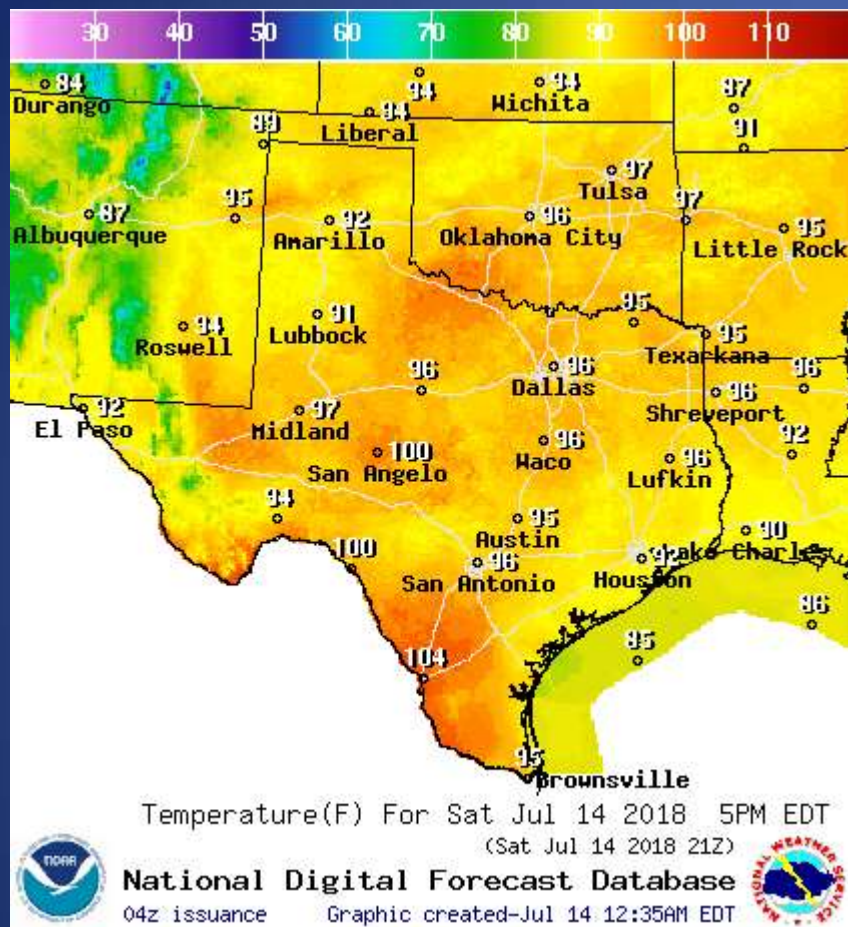

Incidents Reported to the State Operations Center (last 24 hours)

DATE	EVENT / INCIDENT	LOCATION (City/County)	Final Report: Y/N
07/13/18	Initial Report of the Riverbed Wildfire	Childress County	N

Hazardous Weather

Hazardous Weather

Under the influence of a large ridge of high pressure system centered Northeast of the Four State Region and expansion into the area expected to allow daytime high temperatures in the middle and upper 90s. These readings along with the relative humidity values will result in afternoon heat indices from 100-105 degrees. Will see showers and thunderstorms developing around late morning to early afternoon and decrease during the late afternoon and early evening. Overnight low temperatures will range from the middle to upper 70s.

Continued warm temperatures Saturday with highs in the 90s. Isolated afternoon thunderstorms will again be possible.

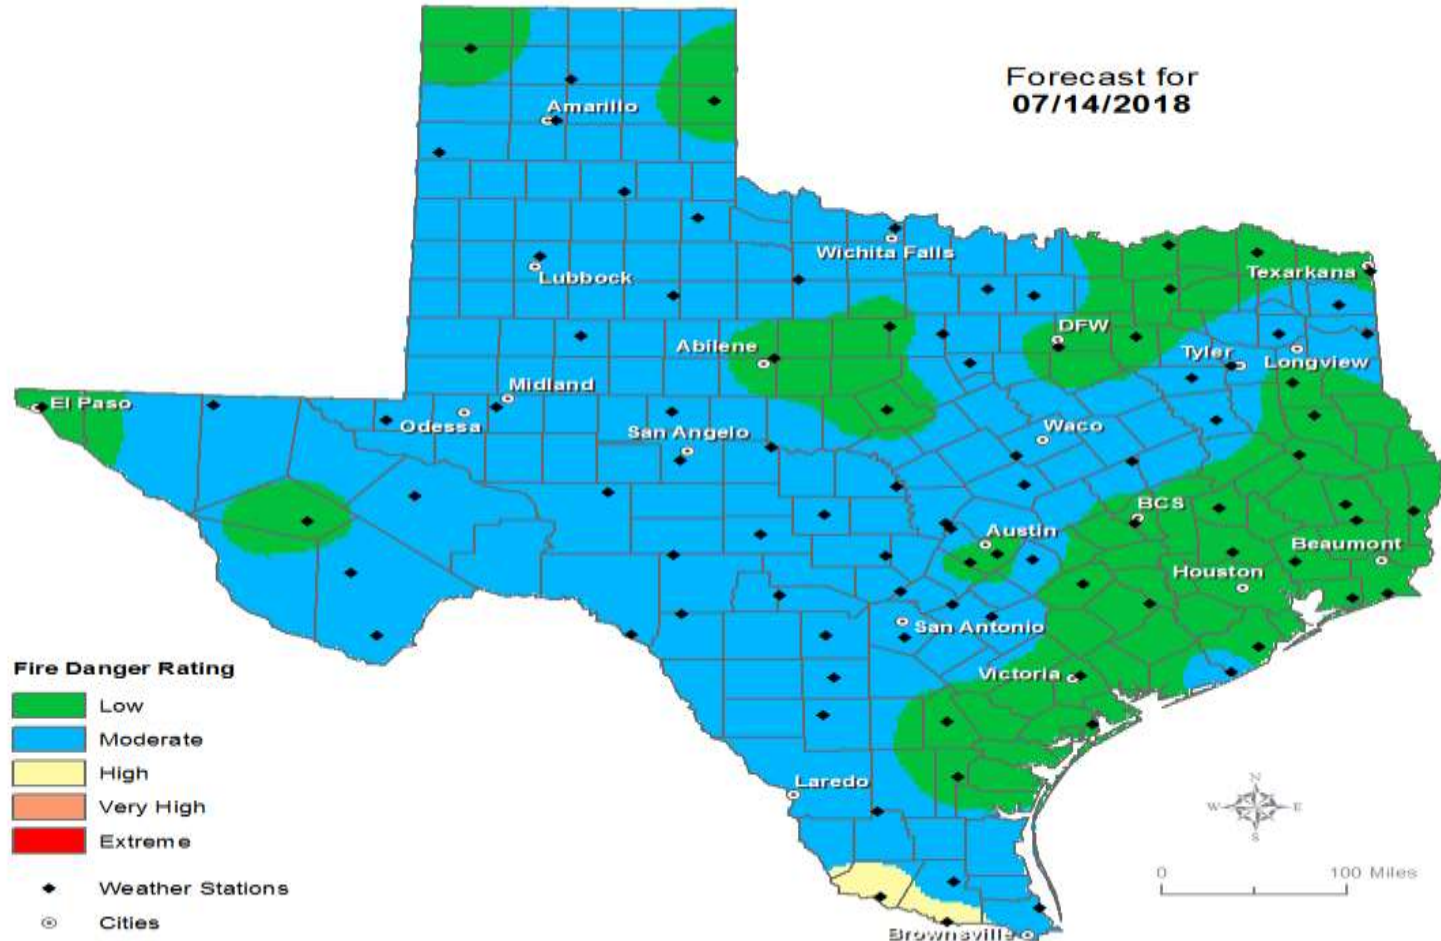

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
